**Subject:** Please distribute to board for this weeks meeting

Fellow Directors,

I will not be able to attend this weeks meeting. I would like to make a few comments regarding agenda item 9. (A)

Lou Carella from Carollo Engineers has provided a "shotgun" sheet of the phasing for the completion of the BMP process. Keep in mind, we will be having a thorough conversation regarding the BMP process including the conservation and delivered water components at the July 18th PVWMA Board of Director's meeting. We will also discuss the outreach efforts presently underway. There have been some justified questions regarding these 'unfinished' components, however, there is a lot more happening on these fronts than most are aware.

I'm looking forward to the upcoming July 18th discussion and the unveiling of the strategies that will support a completed package.

Until then,

Dave Cavanaugh  
PVWMA Director  
Ad-Hoc BMP chair
