WATSONVILLE — The Pajaro Valley Water Management Agency Board of Directors will be holding a meeting on July 10 at 7 p.m. at the Watsonville Civic Plaza Community Room, 275 Main St., fourth floor.

The meeting will be open to the public. Water experts and staff will be present to answer questions and provide information about how to achieve sustainable water resources for the valley.

The College Lake Project off Holohan Road will be the main topic of the presentation. A public comment session will follow.

“The agency is working on the priority projects and programs recommended by our Community Stakeholder committee,” said General Manager Brian Lockwood. “We would like to provide an update to the public and hear their thoughts regarding the implementation of these important projects that are intended to help balance our basin and stop seawater intrusion.”
