**FOR IMMEDIATE RELEASE**

May 8, 2017

## **It's Official – May is Water Awareness Month**

Watsonville, CA –As one of the wettest rainy seasons in history comes to a close, the Pajaro Valley Water (PV Water) Board of Directors declared May “Water Awareness Month.” The Pajaro Valley groundwater basin remains in a state of long-term overdraft, which is why water awareness and water conservation need to become part of our lifestyle. “Even with all the rain the basin is a long way from replenished” cautioned PV Water Interim General Manager Brian Lockwood.

With the unanimous passage of Resolution 2017-04, the board urges all people to join in supporting local water districts and to make water conservation a way of life.

In addition to the proclamation and a conservation program that continues to grow and innovate, the agency is moving forward with new projects designed to decrease the demand for groundwater in keeping with our mission of eliminating groundwater overdraft and seawater intrusion. Additional information is available on the Agency’s website – [pvwater.org](http://pvwater.org).

PV Water is a public agency whose mission is to protect and preserve the water resources within the agency’s jurisdiction, generally the greater coastal Pajaro Valley.
