Subject: Addendum No. 1. Request for Proposals (RFP) to Provide Design and Bid Period Services for the Watsonville Slough System Managed Aquifer Recharge and Recovery Projects

The Watsonville Slough System Managed Aquifer Recharge and Recovery Projects (WSS-MARR) [Supplemental Environmental Impact Report](#) includes, for the purpose of environmental analyses, project components that are beyond the scope of this RFP. To help prospective respondents with their proposals, PV Water is issuing Addendum No. 1, on June 23, 2022, to identify the project components that *should not* be included in the design and bid period services proposal, and to identify PV Water staff members to contact with questions over the next couple of weeks.

Figure 2-1 of the [EIR](#) illustrates all the project components, with the exception of monitoring and production wells, evaluated in the EIR (see figure from [EIR presentation](#) below).

WSS-MARR Project Components

The following project components *should not* be included in proposals:

- Filter Plant to Recharge Basins Pipeline (Green Line)
- North Basin
- SW Basin

For questions related to WSS-MARR or the RFP please email Brian Lockwood (lockwood@pvwate.org), Casey Meusel (meusel@pvwater.org), and Marcus Mendiola (mendiola@pvwater.org).

Brian Lockwood is holding the following times for meetings with prospective respondents:

- July 12: 9:00 am – 11:30 am
- July 13: 9:00 am – 10:00 am, and 1:00 pm – 5:00 pm
- July 14: 1:00 pm – 5:00 pm
- July 15: 1:00 pm – 5:00 pm

If you are interested in meeting, please send an email with your requested date/time and a backup.
